Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Art Unit: 3723

The prior Office action inadvertently omitted the disposition of claims 1 and 3-11. This Supplemental Action corrects that inadvertent error. The error is regretted. The prior Office Action is hereby vacated. A new period of response begins with the date of this Supplemental Action.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 17, 18, 19, 20, 21, and 25 are rejected under 35 U.S.C. 103(a) as being unpatentable over Goldberg in view of Tipton.

In Goldberg Figure 4c 46a is a first plate rotatable on a base and 46b is a second plate rotatable on a base and 48 together with the lower side and top edge of plate 46a collectively is a fixed device (a latch) for combining the two plates. Any edge portion of the respective plates may be termed a first and second guide members to guide a screw driver. The respective portions of the plates that engage the workpiece may be termed respectively first and second receiving portions. In Goldberg Figure 4a alternatively anticipates that there may be plurality of positioning devices 43,44 for combining the first plate and the second plate. The structure of Goldberg is capable of performing the intended use recited in the claims.

Tipton teaches that a fixed device 9,8,13,10 is a fixed device (a latch) for combining a first plate 3 with a second plate 5. The fixed device has at least a first member 8 on the first plate and a second member 9 on the second plate. To employ

Art Unit: 3723

in Goldberg a fixed device ( a latch) comprising a first member on the first plate and a second member on the second plate would have been obvious for one skilled in the art at the time the invention was made in view of the disclosure of Tipton. One of ordinary skill in the art would have been motivated to do this in order to provide a more positive latch (fixed device) that will not inadvertently disengage.

Claims 22-24 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claims 1 and 3-11 are allowed.

Claims 13-16 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected species, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on 6/28/06.

Applicant's remarks have been given careful consideration. Applicant has presented new claims having a new breadth of scope. The newly applied references demonstrate the obviousness of these claims.

**THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any

Art Unit: 3723

extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
